

Ascending car overspeed protection package

Overspeed protection devices ensure maximum safety for both passengers and service technicians in the unlikely event an ascending car exceeds its maximum safe speed limit. In this case, the car could strike the buffers with excessive force. Our upgrade package for all brands of lift comprises a new overspeed governor, new rope and a new guiderail stopping device. These improvements will ensure that an overspeeding car is brought to a safe, controlled stop.

KEY BENEFITS

- Safe, controlled car stop in the event of overspeeding
- Improves occupational safety
- Improves risk management
- Compatible with all lift brands
